Housing

Single-Gender Floor(s) at Hale Mānoa Usage Guidelines

The living units on the 6th and 9th floor(s) of Hale Mānoa are designated for single-gender living while the rest of Hale Mānoa is mixed gender. All common areas -- including those located on floor(s) 6 and 9 -- are gender-inclusive spaces and may be used/accessed by all residents.

Living Units on Floor(s) 6 and 9: *All areas within the physical living unit(s) on floor(s) 6 and 9 (unit bathroom, unit storage, dorm room, etc.) are designated as single-gender spaces. 6th floor living units are intended for only female residents (including gender, gender identity or assigned female at birth) and 9th floor units are intended for only male residents (including gender, gender identity, or assigned male at birth).*

Residents living on these floor(s) who wish to bring a visitor of a different gender into their living units are strongly encouraged to check with their unit mates beforehand. Residents are asked to be respectful of their unit mates' needs or preferences concerning visitors of a different gender.

Common Spaces on Floor(s) 6 and 9: All residents, regardless of which floor they live on and/or their gender identity, are permitted to visit and/or make use of all common spaces on floor(s) 6 and/or 9, including all community kitchens, lounges, laundry rooms and/or any public area outside of the living units.

Visiting residents should be mindful of the space they are taking up in these places, especially in the community kitchens where residents of those floors may have specifically requested to live in a single-gender space, for a variety of reasons.
